

REPORT

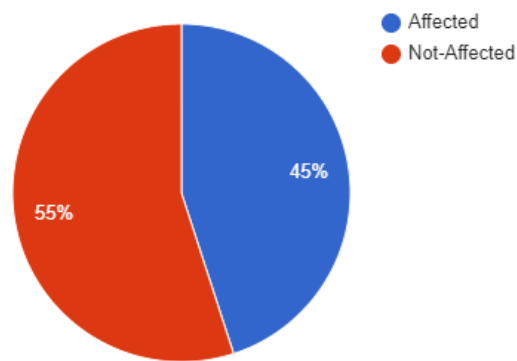

Smart Waste Management Using IOT In Metropolitan Cities

Team Id: PNT2022TMID19946

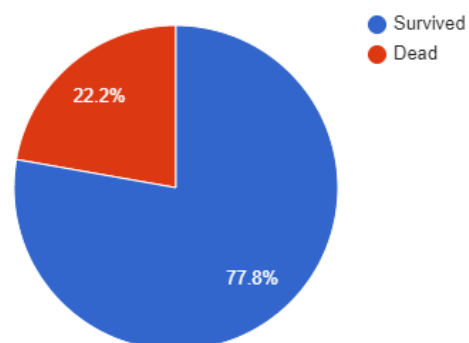

Before Smart Waste Management:

Health Diseases to workers in direct contact with the waste:

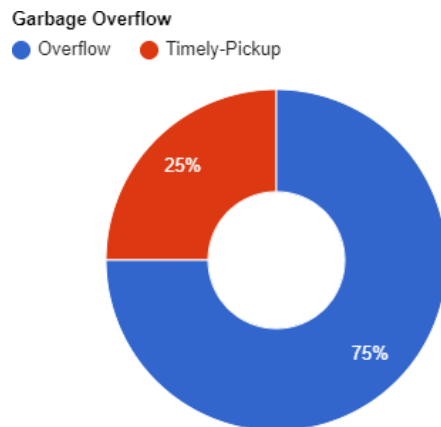

Diseases Due to direct contact of waste by the workers

Affected Workers

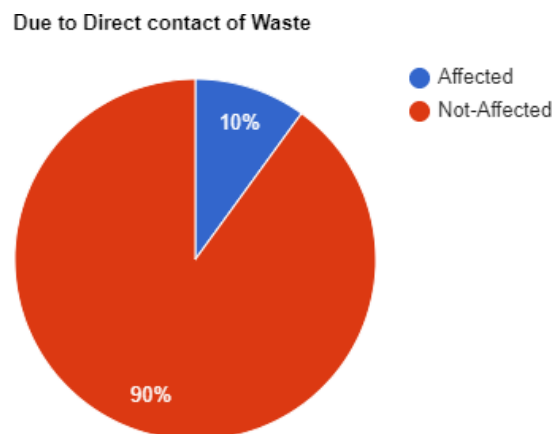

Garbage Overflow and Leakage:

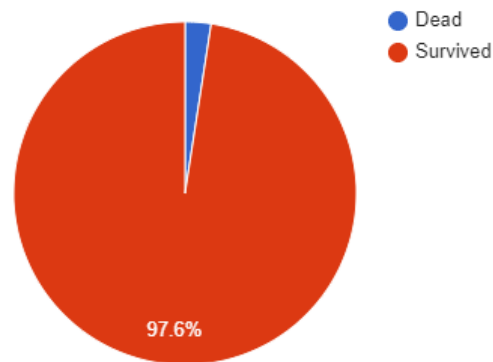

After the introduction of Smart Waste Management:

Health Diseases to workers in direct contact with the waste:

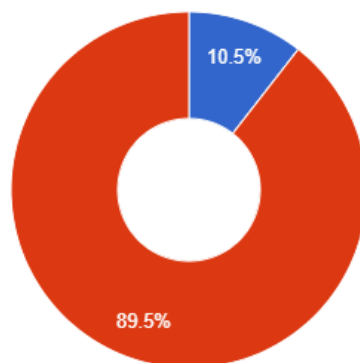

Death Rate

Garbage Overflow and Leakage:

Garbage Overflow

● Overflow ● Timely-Pickup

Thus the introduction of smart waste management have increased human's life value and these graph shows that. It also have increased the air quality by reducing the overflow of the waste garbage.
